### Warnings:

1. Always pay attention to the polarity of the secondary cable.
2. Put the system far from heat sources and in well aerated places.
3. Minimum distance from LED: 10cm.
4. Thermal protection: if the temperature exceeds the limit values, the driver switches OFF and, after few seconds, it switches ON again.
5. Avoid short circuit on the secondary side and give tension only after all LEDs have been connected.
6. Lock the terminals carefully and do not with excessive power.
7. LEDs connection: use a 0,5...1,5mmq cable for a maximum length of 10m; use a 1,5mmq cable for lengths: 10-30m.
8. Input wiring: use a cable 2x0,75 mmq minimum.
9. **HEAVY USE:** the load must be lower than the maximum indicated by 10% to 20% for all kinds of devices.
10. Check the maximum working temperature at tc point.
