

USER GUIDE LEMC13SLIMD

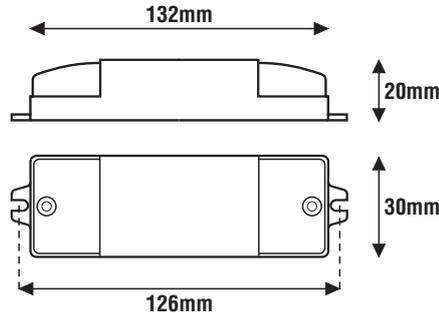

Dimmable constant multicurrent LED driver (CC) with push-button and DALI signal control

www.lef Lighting.it

General Characteristics

Plastic case (SLIM)
Driver not for independent mounting
Electric class protection II
Protection degree IP20

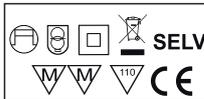

LEF Lighting DALI LED Driver Constant Current
LEMC13SLIMD

Technical Features

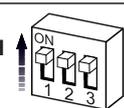

Input voltage range 220-240Vac
Input frequency 50÷60Hz
Input voltage range 176-250Vdc
Input frequency 0Hz
Constant current output 150÷700mA
(settings by dip-switch)
Factory setting: 700mA

Brightness adjustment through:
- push-button (PUSH 230Vac)
- DALI signal

- **Motion Sensor (Corridor Function)**
«LEVEL MEMORY» and «STATUS MEMORY» function
Synchronization of multiple drivers by cable (max 5)
Energy Efficiency (EE) 84%
Open circuit Protection (OCP)
Overload protection (OLP)
Protection against overtemperature (OTP)
Short circuit protection (SCP)
Power factor correction (PFC) $\lambda \geq 0,95$
Operating ambient temperature Ta -20°C ÷ +45°C
Max case temperature on Tc 90°C

DIP SWITCHES WITH ON AT THE TOP

N.B.
Device not suitable for no-load operation.

ATTENTION:

The installation of the product must be followed by qualified personnel. If the product is used for purposes other than the original ones or if it is connected incorrectly, LEF Lighting S.R.L. will not accept any responsibility for damages caused.

ON-OFF mode

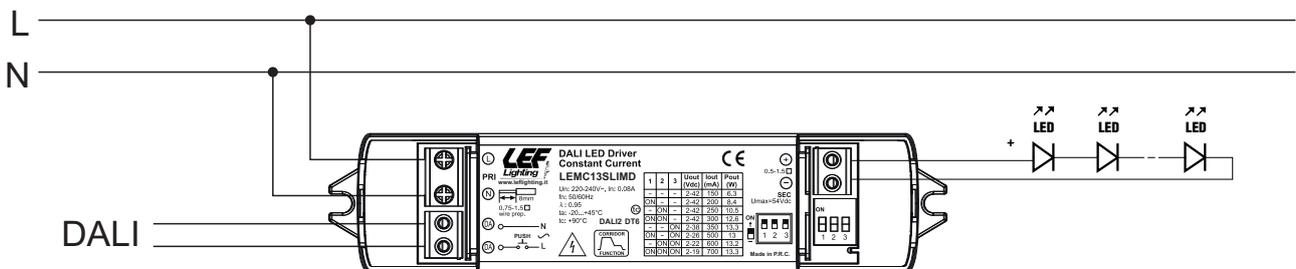

1

Connect a switch on the PHASE to switch the light on and off.
Do not connect the switch on the secondary side of the power supply.

DALI mode

2

In this mode, the LED driver is controlled via DALI signal.

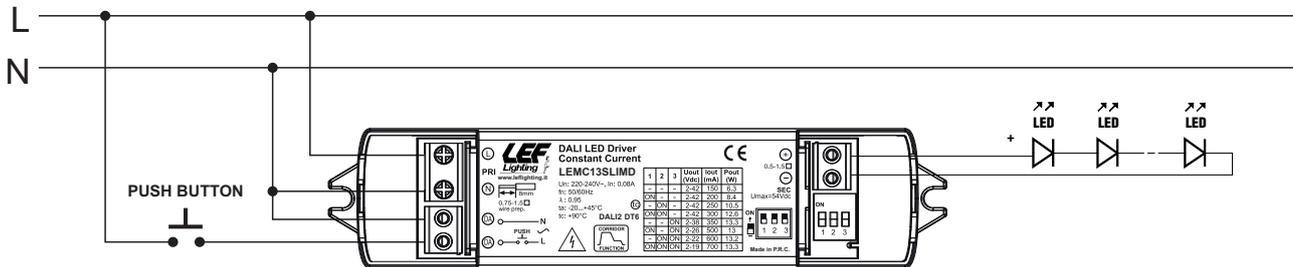

USER GUIDE LEMC13SLIMD

Dimmable constant multicurrent LED driver (CC) with push-button and DALI signal control

PUSH 230Vac mode

3

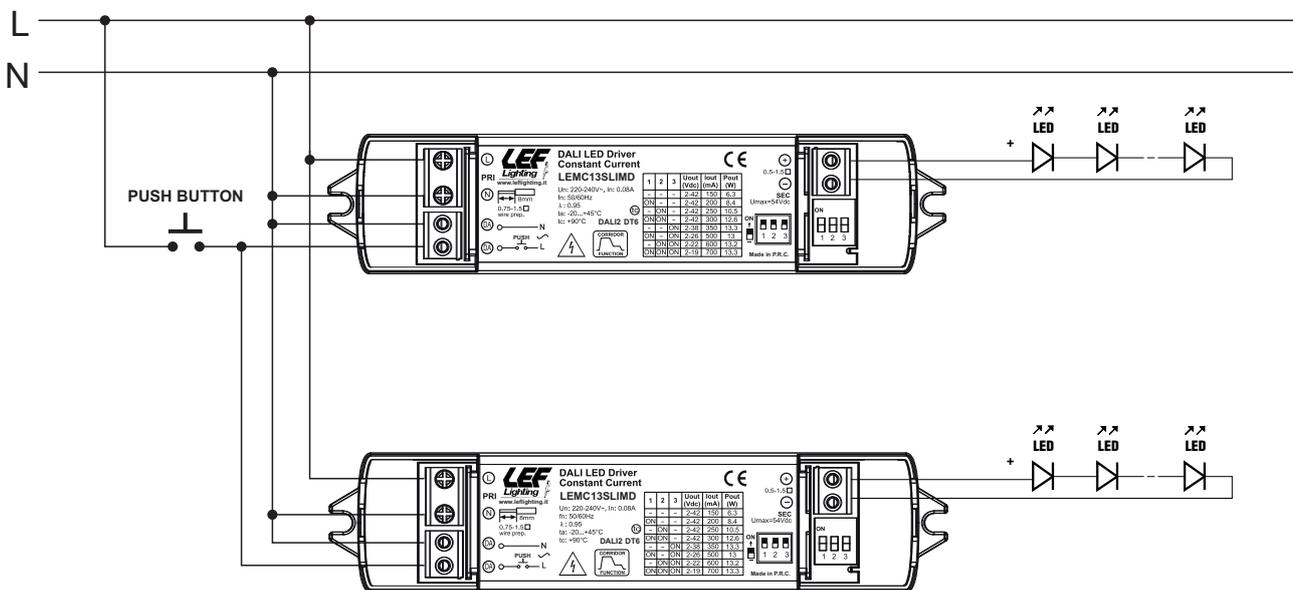

- **Short press(<1sec):** switches LED driver ON and OFF.
- **Long press:** LED modules are dimmed. After repush the LED modules are dimmed in the opposite direction.
- **If the LED driver is switched off,** the dimming value set on the driver will be stored and reset when the power supply is reactivated.

Maximum cable length of PUSH BUTTON: 20m

**DIM
PUSH
230Vac**

PUSH 230Vac and SYNCRO by CABLE mode

4

- **Short press(<1sec):** switches LED driver ON and OFF.
- **Long press:** LED modules are dimmed. After repush the LED modules are dimmed in the opposite direction.
- **If the LED driver is switched off,** the dimming value set on the driver will be stored and reset when the power supply is reactivated.

Synchronisation procedure

By pressing and holding the button for 15 seconds while the light is switched off, the power supplies will synchronize to 50% brightness.

Maximum number of synchronisable power supplies: 5
Maximum cable length of PUSH BUTTON: 20m

CORRIDOR mode™

Activating the CORRIDOR mode

The CORRIDOR mode can be activated in two ways:

By supply voltage:

Apply the supply voltage (220-240V, 50/60Hz) to the DALI input of the driver for at least 5 minutes, the light up 100% (under the default setting).

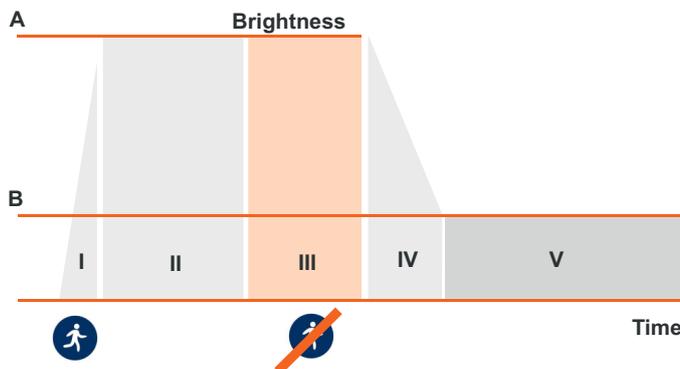

By sensor:

Keep the movement in the effective sensing area for at least 5 minutes, the light up 100% (under the default setting).

Changing from the CORRIDOR mode to the PUSH mode

Connect a PUSH BUTTON as shown in diagram 3 or 4 and press it **5 times within 3 seconds**.

Operation of the CORRIDOR mode

Operating parameters

- A:** Brightness on presence detection: 100%
- B:** Brightness in the absence of movement: 10%
- I:** Fade-in time at the first switched on: 1 sec
- II:** Switch-on time with 100% light: by sensor setting
- III:** Time without movement: 2 min
- IV:** Fade-off time for switch off: 30 sec
- V:** The light remains switched on at 10% until movement is detected.
