

OPTIMA-G/PW

GENERIC transmitters.
Customizable function for each button.

OPT-2G/PW

Wall radio keyboard, 2 channels with settable functions.
Power supply: 230Vac

OPT-4G/PW

Wall radio keyboard, 4 channels with settable functions.
Power supply: 230Vac

OPTIMA-8G/PW

Wall radio keyboard, 8 channels with settable functions.
Power supply: 230Vac.

1 - PRODUCT FEATURES

1.1 TECHNICAL DATA

	OPT-2GPW	OPT-4GPW	OPT-8GPW
Power supply	230Vac		
Button number / channels	2 buttons with settable function	4 buttons with settable function	6 buttons with settable function
Radio frequency	433.920MHz		
Mounting	Recessed		
Degree	IP20		

2 - USE OF TRANSMITTER

START-UP

- Make the connections and fix the transmitter to the junction box, see paragraph 3
- Follow the procedure for associate at least one button with a compatible receiver, see at paragraph 4
- Each press of a button will turn on a led between the buttons in the center of the transmitter

Note: The OPT-2G/PW, OPT-4G/PW and OPT-8G/PW transmitters are generic (wireless bus) family. You can associate the desired function on each button during the pairing phase with the receiver control unit.

For the list of available functions and associated procedures, refer to the manual of the receiver which you want to program the transmitter on.

OPT-8G/PW
8 buttons version

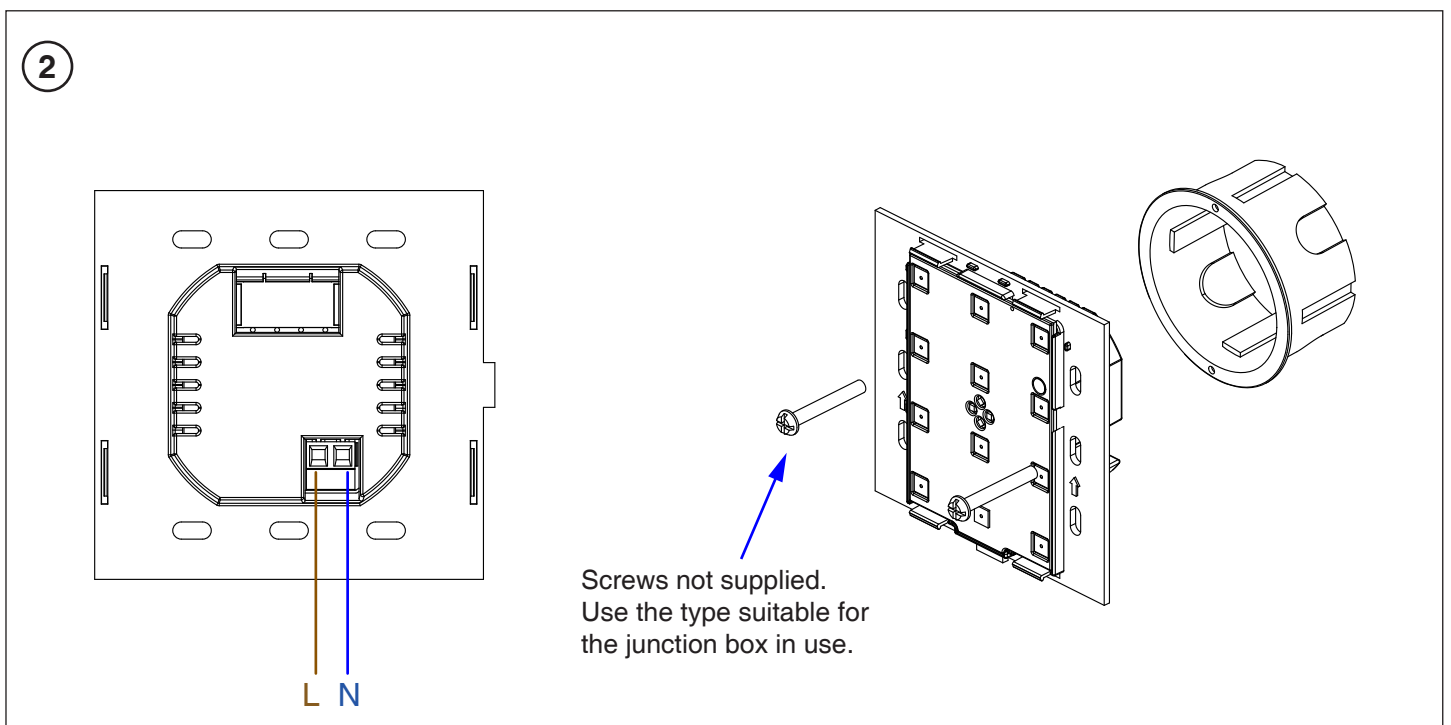

3 - INSTALLATION

1 - Open the used transmitter the apposite slot (fig. 1)

2 - Connect the power supply and fix the transmitter to the junction box (fig. 2)

WARNING

- Installation must be carried out only by qualified technicians in compliance with the electrical and safety standards in force.
- All connections must be made with the power turned off.
- Use suitable cables. - Do not cut through the aerial (picture 1.1b)
- A suitably sized disconnection device must be set up on the electric power line that supplies the product.
- Disposal of waste materials must fully respect local standards.
- Smaltire i materiali di rifiuto nel pieno rispetto della normativa locale.

3 - TRANSMITTER PROGRAMMING

To use the transmitter at least one button (or channel) must be programmed (paragraph 3.1).

3.1 TRANSMITTER PROGRAMMING

Default: no channel programmed.

This procedure is used to programme a channel in order to then associate it with a compatible receiver. Access to the receiver is required to carry out the following procedure.

PROCEDURE

1. Activate the receiver on which you want to use the transmitter in “radio programming of generic transmitters” mode and select the function that you want to associate with the key (see receiver manual).

2. Press the desired key on the transmitter, the receiver’s LED flashes three times to signal it has been received.

Please read the recipient’s manual, “radio programming”.

The center in the image is for example only.

GENERIC TRANSMITTER
(WIRELESS BUS)

ACTION: Send a command from the transmitter
RECEIVER LED: Flashes 3 times

4 - DELETION OF A CHANNEL

This procedure is to delete one of the transmitter’s channels from the memory of the receiver on which it was programmed.

PROCEDURE:

1- Access the receiver and carry out the “delete single transmitter” procedure (see receiver manual).
